Ex. 6 - Personal Privacy

I sent you the well survey form last Thursday - early afternoon. At that time the decision to supply water and sample had not been made. It was made later in the day and Ex. 6 - Personal Privacy I talked to you on Friday morning and let you know at that time that sampling and water would be supplied. I'm sorry if that wasn't quick enough. The residences that were chosen for water deliveries were selected on the basis of contaminants in their sampling results and lack of consistent water supply. I don't believe your house was in this group. We are getting the sampling program started with the four residences and expanding it from there. When your property is up for scheduling you will be contacted so we can get an access form completed and the sampling scheduled.

Very respectfully,

David Polish

Hello David!

I want to Thank you for contacting me with the informational sheet you did so on Thursday, however, after catching up to speed with others in our shoes, I've learned that I'm more or less the last to know 'at best' in regards to things going on with EPA and water decisions. I had provided you my email for many reasons, one was to be updated on announcements yet many announcements have happened and I have yet to be informed. Also, I was told that your Department had decided that 8 homes were in need of water delivery but you narrowed it down to 4. I am curious to know, was our home one of the 4 not being provided water? I don't have a problem either way, but it's nice to understand or be acknowledged during this process. I also understand you are planning on sampling our neighbors as soon as Thursday, do you have an idea when you want to test our water and would you like to provide me an "access agreement" so we can facilitate that? I also hear that your Dept. has invited PA-DEP and Cabot. I do have a preference as to who is or is not invited during that time. Please advise on all of the above.

With Regards,

Ex. 6 - Personal Privacy

Ex. 6 - Personal Privacy

Thanks for the quick reply. As you may have heard, we have the authorization to start testing. We will need to get an access agreement to you to allow us to perform testing. We will make sure any instructions you propose will be followed.

Very respectfully,

David Polish

Hello David,

I have completed and faxed that over to Trish Taylor a few minutes ago. The well spigot is set up where it can be accessed without anyone there. However, there are a few details, and if overlooked it will cause my well pump to burn out. Is EPA willing to fix any error or damage due to their operations? I'm not trying to be harsh but it's obviously important. It's a very simple operation to run the well, but it is also easy to forget to turn off the electric to the well pump which will burn the pump out. Thanks § Ex. 6 - Personal Privacy

Ex. 6 - Personal Privacy

Below is a well survey form. It is part of the process for gathering information directed towards the possible sampling of well water. Please fill it out and send it back to Trish Taylor. Also, could you provide a point of contact up in Dimock that could provide access to your property if we do decide to sample?

Very respectfully,

David Polish
